It is estimated that:

SCD affects 90,000 to 100,000 Americans.

SCD occurs among about 1 out of every 500 African-American births.

SCD occurs among about 1 out of every 36,000 Hispanic-American births.

SCT occurs among about 1 in 12 Blacks or African Americans.

SCD affects every race even though it's been known to hugely affect African-Americans
